## **Semaphore Products Will Be on Exhibit at Entelec 2008**

NASHUA, NEW HAMPSHIRE – March 13, 2008 – [Semaphore](#), a CSE Global company, announces that its [SCADA system](#) products will be on exhibit at Entelec 2008. This event will be held at the George R. Brown Convention Center in Houston, Texas, April 9 – 11. Semaphore’s exhibit, at booth 637, will feature the T-BOX and Kingfisher product lines.

T-BOX is the first IP-based [RTU](#) solution that enables the complete integration of SCADA, control, and communications functionality in one rugged package. It leverages easy-to-use Web technologies and inexpensive public networks for decentralized, monitoring and control systems. T-BOX products offer up to 50% less total installed cost per point versus traditional SCADA/PLC systems and permit greater organizational access to data through automated reporting and browser software.

The Kingfisher RTU line provides many advanced features for SCADA system solutions, including redundant configurations, intelligent I/O, and open programming that is compliant with IEC 61131-3. Kingfisher is also the first RTU product line that is compliant with IEC 61499, the distributed processing and interoperability extension to IEC 61131-3. Kingfisher systems are well suited to large, demanding measurement and control applications that employ central stations.

Semaphore’s T-BOX and Kingfisher RTU products are ideal for a broad range of monitoring and control applications in the broadcast / telecom, infrastructure management, oil & gas, power, transportation and water / wastewater industries. For more information about Semaphore

solutions, visit [www.cse-semaphore.com](http://www.cse-semaphore.com), or contact Semaphore at 15B Charron Avenue, Nashua, NH 03063, 603-577-3803.

Entelec 2008 provides an excellent opportunity to see the latest in communications and SCADA systems technology. Attendees can join industry professionals in over 50 hours of technical papers, 200 exhibits, and a variety of networking events. For more information, visit [www.entelec.org](http://www.entelec.org).

### **About Semaphore**

Established in 2006, Semaphore was the result of a merger of two CSE Global companies, RTUnet, of Australia, and TechnoTrade SA, of Belgium. For over 20 years, these companies have provided leading solutions for telemetry, automation, and remote monitoring and have an installed base of more than 70,000 devices. For more information, visit [www.cse-semaphore.com](http://www.cse-semaphore.com).

Semaphore is a wholly owned subsidiary of CSE-Global Limited (CSE), a Singapore-based, industrial integration, manufacturing and distribution group with locations in 20 countries. CSE employs more than 1,000 people worldwide, with over 85% representing its design, engineering, and project management capability and experience. For more information, visit [www.cse-global.com](http://www.cse-global.com).
