Semaphore Announces SCADA VAR Agreement with Plexus

LAKE MARY, FLORIDA – October 27, 2009 – [Semaphore](#), a CSE Global company, welcomes Plexus Technology Limited to the Semaphore partner network as a value added reseller for the [T-BOX](#) and [Kingfisher SCADA system](#) product lines. Based in the U.K., Plexus specializes in energy management and facilities management systems for the industrial and public sectors.

According to Martin McWilliam, [Plexus](#) Chairman and Chief Executive Officer, “Plexus is seeing increasing demand from integrators and real estate owners for a low cost ‘BMS (Building Management System) in-a-box solution that can be integrated into one common graphical user interface via the Web, with the rest of our building portfolio. T-BOX is a proven, world class, product that complements Plexus’s existing expertise in systems integration and visualization. It enhances Plexus’s offering for enterprise-wide monitoring and control of a real estate portfolio, thereby enabling vital tasks such as risk and energy management, as well as CRC compliance, to be undertaken in an even more effective manner.” For more information, visit www.plexus-technology.com.

Semaphore’s T-BOX is the first IP-based telemetry [RTU](#) that enables the complete integration of [SCADA](#), control, and communications functionality in one rugged package. It leverages easy-to-use Web technologies and inexpensive public networks for decentralized, monitoring and control systems. T-BOX will be integrated with Plexus’s intelligent middleware software as part of Plexus’s strategy of offering a complete solution to customers who want to create an intelligent, web-based, connected real estate network.

The Kingfisher [RTU](#) line provides many advanced features for [SCADA system](#) solutions, including redundant configurations, intelligent I/O, and open programming that is compliant with IEC 61131-3 and IEC 61499. Kingfisher systems are well suited to large, demanding measurement and control applications that employ central stations.

Semaphore's T-BOX and Kingfisher RTU products are ideal for a broad range of monitoring and control applications in the broadcast / telecom, infrastructure management, oil & gas, power, transportation and water / wastewater industries. For more information about Semaphore solutions, visit www.cse-semaphore.com, or contact Semaphore at 1200 Chantry Place, Lake Mary, FL 32746, 407-333-3235.

About Semaphore

Established in 2006, Semaphore was the result of a merger of two CSE Global companies, RTUnet, of Australia, and TechnoTrade SA, of Belgium. For over 20 years, these companies have provided leading solutions for telemetry, automation, and remote monitoring and have an installed base of more than 70,000 devices. For more information, visit www.cse-semaphore.com.

Semaphore is a wholly owned subsidiary of CSE-Global Limited (CSE), a Singapore-based, industrial integration, manufacturing and distribution group with locations in 20 countries. CSE employs more than 1,000 people worldwide, with over 85% representing its design, engineering, and project management capability and experience. For more information, visit www.cse-global.com.
